Fishing Business No/s.:

Reform options for the general netting component of the NSW Ocean Hauling Fishery

Seeking Feedback

DPI, in consultation with working groups, has developed options packages for consideration by shareholders for each of the fisheries involved in the reform process. Several fisheries specific options papers are available.

Some of the key objectives of the commercial fisheries reform program are to:

- improve the long-term viability of the NSW commercial fishing industry;
- improve the strength and value of shareholders' access rights (i.e. shares); and
- provide shareholders with improved opportunities and flexibility to tailor their access.

Your feedback and comments on the options including those that will best deliver the reform objectives are sought.

This form has been provided to assist you in commenting on the merits of the reform options presented, including both the share linkage options and the potential changes to current restrictions.

Privacy notice: A summary of all submissions received will be made publically available. The SARC will be given the summary of responses as well as a copy of each individual submission.
