

Fishery activity

Gross value of production (GVP) is the total revenue earned by all fishing businesses in the fishery over the year by selling their catch. It is calculated using beach price.

GVP (\$m, real 2023/24)

Catch (tonnes, 2023/24)

Post-harvest supply chain

Value of output is a measure of the revenue generated by the fishery and on-selling and/or value-adding Sea Urchin & Turban Shell Fishery products along the post-harvest supply chain. Direct output is useful to understand the value of the Sea Urchin & Turban Shell Fishery throughout the post-harvest supply chain. The output of the fishing sector is the same as the GVP of the fishery.

Direct value of output (\$m), by post-harvest supply chain stage, 2023/24

Final sales destination (%), 2023/24

Contribution to New South Wales

These indicators include direct activity and downstream (i.e. food service, capital, processing & marketing, transport, retail and food service) as well as flow-on effects or indirect activity in other sectors of the economy through purchases of inputs and the employment of labour.

Gross state product (GSP)

Contribution to gross state product is a measure of the net contribution of the fishery to the state economy.

Household income

Household income is a component of GSP and is a measure of wages and salaries, drawings by owner operators and other payments to labour.

Employment

Contribution to employment (fte) is a measure of the number of full-time equivalent (fte) jobs supported by the fishery.

Net economic return

Net economic return (NER) is the return from a fishery after all costs have been met. Costs include: labour, cash costs, depreciation and an allowance for 'normal' profit. This is the preferred indicator of economic efficiency.

Components of NER (\$m, real 2023/24)

NER (\$m, real 2023/24)

Return on investment

Return on investment is the profit at full equity as a percentage of total capital employed.

Total GSP (\$, real 2023/24) and employment (fte)*

*The results increase from 2022/23 is due to improved supply-chain modelling.

Social indicators

These indicators provide a summary of fishers' perceptions regarding fishing rules and regulations, fisheries management, satisfaction with fishing, global life satisfaction (economic prosperity and stability), and future security in the fishery in 2023/24.
